## i9 Informed Water Bottle

i9 informed bottle is energised with internationally awarded Poznik Technology (TP), which returns water to its natural vitality. Water regains natural molecular structure (aliveness), becomes softer and more pleasant to drink. Made from quality glass it is a natural alternative to plastic consumables. For ease of use glass is protected with silicone rubber bands, which improve stability on slippery surfaces, provide for a stronger hand-grip and offer additional protection from accidental breakage. Silicon rubber bands are available in fashionable or chakra colours, thus offering an opportunity for healing through colour therapy. i9 bottle is suitable for hot or cold beverages.

## i9 Products, Technology & Awards

i9 products are informed using Technology Poznik (TP), which has been proven to positively influence the molecular structure of water with the aid of information code. Encoding encompasses strict testing procedures and every finished product is awarded a unique certificate of quality. i9 informed products come with lifetime warranty on encoding. Positive influence upon water has been confirmed by cytogenetic tests and by Berlin Institute of Electrophotonics. Technology Poznik (TP) is backed by 30 years of research and was developed by a team of world class inventors, who received over 90 international awards and recognitions for their exceptional achievements and inventions.

## Berlin Institute of Electrophotonics

Institute of Electrophotonics in Berlin carried out extensive tests using GDV camera. Tests revealed drinking water from i9 informed water bottle improves human energetic bio-field by over 11%, as well as lowers stress levels by some 25%, when compared to drinking water from a normal glass.

## Natural drinking water

Our body needs “alive” water, because only in its natural state water effectively penetrates the cell membranes and promotes transport of essential nutrients. When our body doesn’t receive naturally energised water it draws upon own energy reserves to revitalise it, thus wasting precious energy reserved for self-healing, homeostasis and maintaining balance between internal and external environment. As a result, our immune system is left depleted and more susceptible to potential illness.
