

# SIMPLY PERFECT H200

**All in one.  
Indulge in free space, free hands, free time.**

No need to cut ingredients into small pieces anymore with Hurom's All-in-One Slow Juicer. A complete juicing system from start to finish, from chopping to juicing.

# Hurom's Slow Squeezing Technology

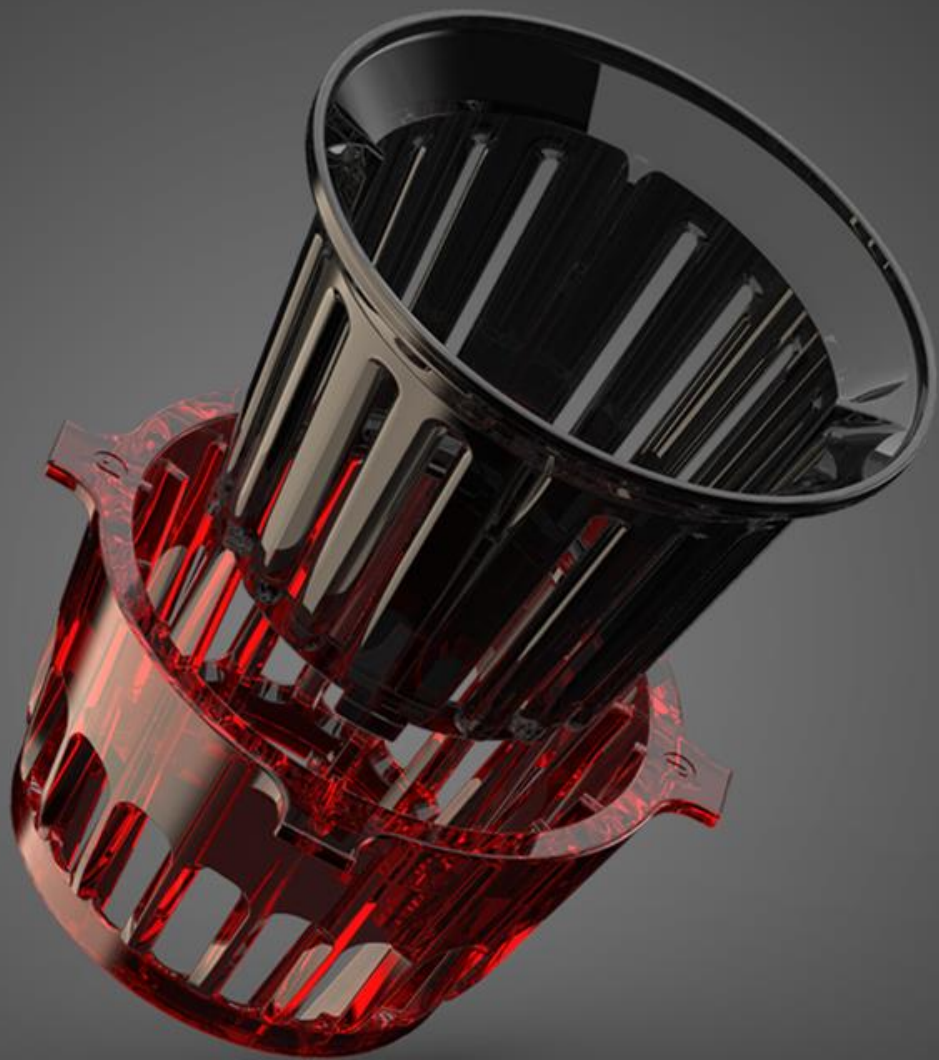

The slowly rotating screw squeezes and extracts nutrients while generating a minimal amount of frictional heat and oxidization, keeping taste, colors, and nutrients intact.

## Screw

The helical screw minimizes the area in contact with ingredients for maximum benefits in efficiency and your health.

## Dual-strainer

The dual-strainer system does not miss a thing, squeezing once on the inside and once on the outside to thoroughly extract nutrients and juice.

# Mega Hopper

Hurom's Mega Hopper is an entirely new experience making healthy living easier than ever.

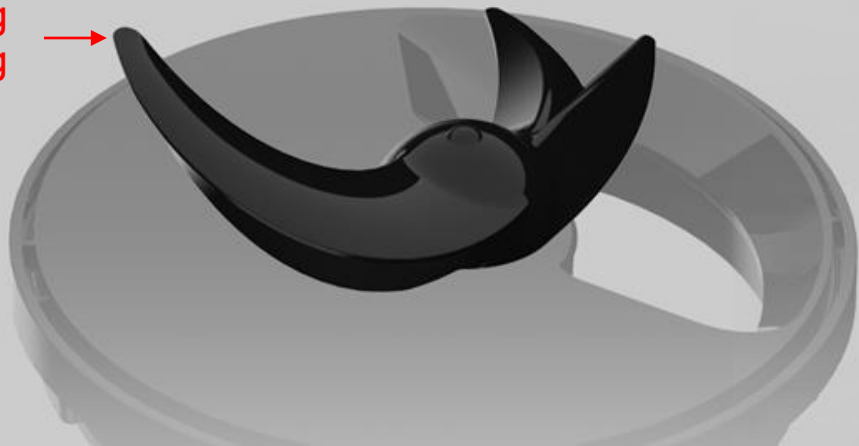

## More room, less prep work

Enjoy the perks of a wider hopper chute by placing in whole fruits and vegetables instead of chopping them into pieces.

## Automatically Cut, Inserted, and Extracted

Introducing the newly designed Trimming Wing, cutting and pushing the ingredients inside, which means you don't have to.

Trimming  
Wing

## Fit more ingredients in the Mega Hopper

The wider, deeper Mega Hopper can easily handle bigger quantities, and sizes, of fruits and vegetables.

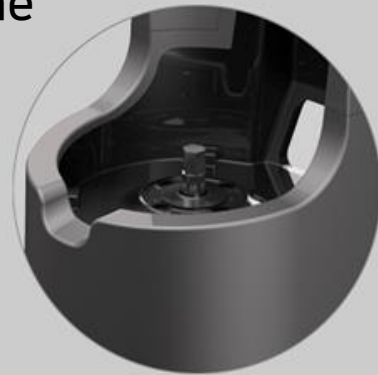

## Clean up made easy

Specially designed strainers minimize pulp build-up between the strainer gaps for a quick, easy, and thorough wash.

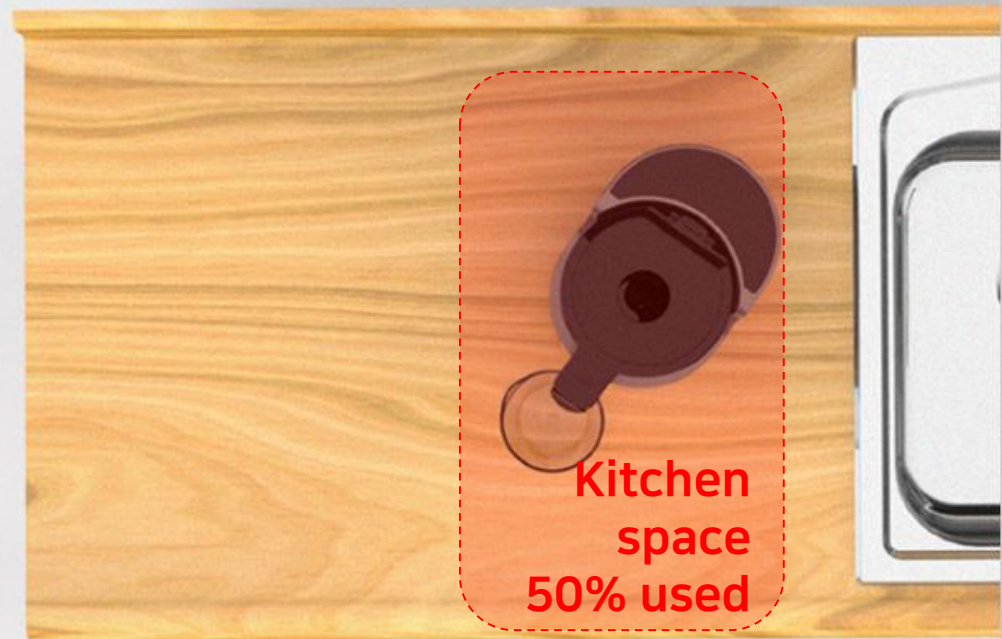

## Simplified design for easy assembly

The design provides pre-determined grooves that fit together when the Mega Hopper Set is placed onto the body, for a perfect fit every time.

## Simplified design for space efficiency

The pulp cup is integrated into the body,  
taking up less space in your kitchen.

## 7-degree tilt for every last drop

The slanted chamber bottom ensures that you get all the juice you made, naturally.

## Auto-locking Safety Sensor

The juicer will automatically stop if the lid is opened during use, for your safety.

---

## Hopper Handle for portability

The sturdy handle attached to the hopper allows you to easily carry the chamber set.

## Hopper Chute for continuous juicing

Keep adding ingredients while the juicer is juicing through the hopper chute.

## H200 Specification

<b>Dimension</b>	286(W)*176(L)*445(H) mm
<b>Weight</b>	6.5kg
<b>Chamber</b>	400ml
<b>Power consumption</b>	220w
<b>Rated frequency</b>	50/60Hz
<b>Voltage</b>	220-240v
<b>Cord length</b>	1.4m
